Year Totals										\$

Directions:

1. Add each individual date across to total your individual weekly income.
2. Add each child's columns down to total the year's income for that child. This is the amount that child paid you all year.
3. Add each individual weekly income down to total your gross years income. This is the amount you claim on your income taxes. You can cross check this by adding your year totals across. Both columns should total the same amount.

**Gross Year
Total**

\$ _____
You claim this amount on your
income taxes.
